

NGUYEN VAN NGHIA

AI Engineer

Hanoi • 0896634164 • vannghiands@gmail.com • <https://github.com/itsnghanvn>

As a passionate graduate in Artificial Intelligence, I am seeking an AI Engineer position where I can apply my skills in machine learning, computer vision, and data analysis to real-world projects, contribute to impactful solutions, and continuously develop into a professional AI engineer.

EDUCATION

Information Technology, UTC

2021 - 2025

WORK EXPERIENCE

AI Engineer – HISOTEK

9/2025 - present

- Built scalable pipelines to process and analyze video streams from surveillance systems
- Trained and fine-tuned computer vision models for real-time behavior recognition
- Deployed AI inference systems in production, ensuring stability and low-latency performance
- Optimized model performance and inference speed for edge/real-time environments
- Monitored system metrics and resolved issues in live deployments
- Collaborated with cross-functional teams to integrate AI solutions into camera systems

Data Analyst Intern - StrongBody

4/2025 - 8/2025

- Processed and cleaned large datasets to support downstream analytics and modeling tasks
- Automated data workflows using LLM tools (ChatGPT, Gemini), improving team productivity
- Built internal dashboards to monitor operational metrics and performance
- Collected and structured textual data for internal communication and analysis

PERSONAL PROJECTS

Helmet Violation Detection using YOLO11 (Graduation Project) [\(link\)](#)

- Built a real-time detection system with YOLOv11 & PyTorch.
- Collected & annotated 9,000+ traffic images via Roboflow.
- Achieved 93% mAP@0.5 on validation set.
- Deployed interactive demo with Streamlit + OpenCV.

Book recommender system using LLM [\(link\)](#)

- Developed a semantic recommendation system that suggests relevant books from user queries.
- Preprocessed and embedded book descriptions with Sentence-Transformers.
- Built a semantic search pipeline using LangChain and deployed with Gradio.

TECHNICAL SKILLS

- Languages: Python, C++, SQL
- ML/AI: PyTorch, TensorFlow, Transformers, Computer Vision, NLP
- Tools: OpenCV, LangChain, Streamlit, Gradio, Roboflow
- Data: Pandas, NumPy, Scikit-Learn

CERTIFICATES

- Scientific Research Training — UTC [\(link\)](#)
- Google Data Analytics Professional Certificate [\(link\)](#)
- AI/ML Certificate — VTI Academy [\(link\)](#)
