📍 Village 5, Nam Truc, Ninh Binh

CAREER OBJECTIVE

Fresher AI Engineer with experience in data processing, computer vision, and system deployment. Seeking to apply technical skills to support IT system operation, data management, and automation in a real-world working environment. Committed to stable, long-term contribution to organizational technology operations.

EDUCATION

Bachelor of Information Technology

University of Transport and Communications (UTC)

2021 - 2025

TECHNICAL SKILLS

System & IT

- Linux/Windows setup, Basic deployment
- Data management, Git, Docker

Programming

- Python, SQL, C++

AI & Computer Vision

- PyTorch, TensorFlow, OpenCV
- NumPy, Pandas, Scikit-learn

Tools

- Excel, Streamlit, PowerBI, Google Colab

LANGUAGE

- English

WORK EXPERIENCE

AI Engineer — HISOTEK

Sep 2025 – Present

- Collected, processed, and managed video data from surveillance camera systems
- Trained and optimized computer vision models for behavior recognition
- Built data processing and inference pipelines for AI camera systems
- Deployed, monitored, and optimized system performance in real environments
- Supported testing and troubleshooting during system operation

Data Analyst Intern — StrongBody

Apr 2025 – Aug 2025

- Processed and managed operational data using Python and Excel
- Automated internal reports to reduce manual workload
- Built dashboards to monitor operational performance
- Standardized and organized data for internal system use
- Supported software environment setup and issue handling

PROJECTS

Helmet Violation Detection System (YOLOv11)

- Developed a real-time image detection system using PyTorch
- Collected and processed 9,000+ training images
- Deployed an interactive demo using Streamlit
- Optimized detection accuracy and processing performance

LLM-based Book Recommendation System

- Built a semantic search and recommendation pipeline
- Processed and embedded textual data for retrieval
- Deployed a user-facing demo application

CERTIFICATES

Scientific Research Training — UTC ([link](#))

- Research design, data collection & analysis, technical report writing.

Google Data Analytics Professional Certificate ([link](#))

- Data cleaning, analysis, visualization, and reporting.

AI/ML Certificate — VTI Academy ([link](#))

- Machine learning fundamentals, model workflow, practical AI applications.
